Bulbs - Plants - Rose Bushes - Shrubs - Trees

P. O. BOX 343.
SAN JOSE, CALIFORNIA.

LIST NO. 3903.

FEB. 10, 1939.

GROWING ON STOCK

Everything offered below is high grade material which we have grown primarily for our own use but of which we have more than we need for this season's planting.

NEW AND SCARCE PLANTS. In addition to a better class of commonly known varieties we offer you a splendid opportunity to obtain many new and scarce items, propagated from stock that took us many years and much trouble to import from all over the world.

QUANTITY RATES. $2\frac{1}{2}$ " pot stock is offered 25 or more of a size and kind at the 100 rate. Add 20% for smaller quantities. Conifers in 4" pots - 5 or more of a size and kind at 10 rate, 25 or more at 100 rate.

SHIPPING. Please state whether you want goods sent by freight, express or truck line. If you do not want immediate shipment give an approximate date.

PACKING. At cost as usual.

ABBREVIATIONS. G grafted; C cuttings; S seedlings.

Lining out stock is customarily offered from 2" pots but DO YOU KNOW THAT a $2\frac{1}{2}$ " pot holds almost exactly twice as much as a 2" pot! Consequently our plants in $2\frac{1}{2}$ " pots show a corresponding difference.

We are now pretty well caught up on advance orders and can give you 24 hour service, weather conditions permitting.

B R O A D L E A V E D E V E R G R E E N S

(all from $2\frac{1}{2}$ " pots except where otherwise indicated.)

VIBURNUM BURKWOODI

To receive an Award of Merit of the Royal Horticultural Society it must be good! This is probably the most valuable novelty in flowering shrubs that has appeared for years. Recently originated in England as the outcome of a cross between the well-known deciduous *Viburnum carlesii* and the little-known evergreen *Viburnum utile*. The result is a fast growing, very hardy semi-evergreen shrub bearing flowers as fragrant as *V. carlesii*, but in far larger heads up to four inches broad containing as many as 250 individual flowers. These are pinkish in the bud, but open white, and appear about a month earlier than those of *V. carlesii*. Foliage is rich, glossy green, which turns purplish bronze with winter weather, some of the lower leaves assuming vividly brilliant red and yellow autumnal tints. Prof. L. G. Chadwick of Ohio stated recently: "I am convinced that *Viburnum burkwoodi* will become an outstanding favorite as soon as it is better known."
